

	Year:	2	Skill:	Computer Science
	Taught in Units		What will I learn this year?	
	2.1 Coding		- To create and debug an algorithm - To use the timer-after command - To predict the behaviour of simple programs	
Key Vocabulary		 	What should I already know?	
algorithm	An accurate set of instructions		To sort items online and offline	
bug	A problem in coding		To understand that an algorithm needs to be precise	
sequence	A certain order		To use arrow keys to alter directional movements	
character	A person/character in a story		To draw symbols to represent instructions in coding	
debug	To fix a problem in the code		What will I learn next?	
command	To tell someone what to do		To use a flowchart to create a computer program	
timer	Something that counts the time		To use the timer-every and repeat command	
			To confidentially make several different things happen in a program.
